

## Announcements for Lecture 11/12/24

### Final Exam

- Start studying for the final exam
  - ANY TOPIC covered in the lab or homework material can be on the exam
  - Print out past exams and use them to practice
- Make a cheat sheet
- Points and question topic breakdown:
  - Python (60 pts)
  - C++ (20 pts)
  - Circuits and logical expressions, binary and hexadecimal numbers (10 pts)
  - Terminal commands (5 pts)
  - Machine Language (5 pts)
- Pass/NC okay for non-majors

### Quiz grading and homework posting are delayed

- Apologies for the confusion; hopefully, it will be finished this week, and you will receive an update about the future homework assignments
- For now, all homework assignments will be reopened until November 19 while the schedule is being reorganized
  - Remember that no homework assignments will be dropped, so please upload any missing submissions
- As of right now, quizzes 1, 2 and 4 are published
  - Please review the rubric items for each question; if you believe the wrong rubric item was applied, please submit a regrade request!
- All labs are posted and updated; start reviewing those topics ASAP
