3

990

Review of Lecture 1: turtle graphics

- Imagine a turtle has a pen; when it moves forward some distance, a line is drawn on the screen.
- The turtle can also turn left some amount of degrees.

```
import turtle
1
2
    t = turtle . Turtle()
3
4
    #draw side one
5
    t.forward(100)
6
    t. left (120)
7
8
    #draw side two
9
    t.forward(100)
10
    t. left (120)
11
12
    #draw side three
13
    t.forward(100)
14
    t. left (120)
15
```

Review of Lecture 1: for-loops

- The previous program used the turtle module to draw a triangle
- Rewrite the program using a for-loop

```
import turtle
    import turtle
    t = turtle.Turtle()
    for i in range(3):
        t.forward(100)
        t.left(120)
```

For more commands, read turtle documentation

CSci 127 (Hunter)

Pseudocode describes the general algorithm our program will follow; it is language-agnostic and can be translated into any programming language. Import the turtle library Instantiate a turtle object called t Initialize n to be an integer greater than or equal to 3 Repeat the following n times: (1) t moves forward a fixed distance (2) t turns left 360 / n degrees

10 / 33

range()

Simplest verbatimsion:

- range(stop)
- Produces a list: [0,1,2,3,...,stop-1]
- For example, if you want the list [0,1,2,3,...,100], you would write:

range(101)

3

Sac

イロト イポト イヨト イヨト

range()

What if you wanted to start somewhere else:

• range(start, stop)

 Produces a list: [start,start+1,...,stop-1]

• For example, if you want the list [10,11,...,20] you would write:

range(10,21)

≡ ∽ar

イロト イポト イヨト イヨト

range()

What if you wanted to count by twos, or some other number:

- range(start, stop, step)
- Produces a list: [start, start+1*step, start+2*step, start+3*step, ..., last] (where last is the largest start+k*step less than stop)
- For example, if you want the list [5,10,...,50] you would write:

range(5,51,5)

▲□▶ ▲□▶ ▲□▶ ▲□▶ □ − ∽ Q (~

In summary: range()

The three verbatimsions:

- range(stop)
- o range(start, stop)
- range(start, stop, step)

<ロト < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < 回 > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □

996

<ロト <回ト < 回ト < 回ト

Variables

- A variable is a reserved memory location for storing a value.
- Different kinds, or **types**, of values need different amounts of space:
 - ▶ int: integer or whole numbers
 - float: floating point or real numbers
 - string: sequence of characters
 - Ist: a sequence of items
 e.g. [3, 1, 4, 5, 9] or
 ["violet","purple","indigo"]
 - class variables: for complex objects, like turtles.
- In Python (unlike other languages) you don't need to specify the type; it is deduced by its value.

Sac

イロト イポト イヨト イヨト

Variable Names

There's some rules about valid names for variables.

- Can use the underscore ('_'), upper and lower case letters.
- Can also use numbers, just can't start a name with a number.
- Can't use symbols (like '+' or '*') since used for arithmetic.
- Can't use some words that Python has reserved for itself (e.g. for). (List of reserved words in *Think CS*, §2.5.)

String Methods

```
s = "FridaysSaturdaysSundays"
num = s.count("s")
```

- The first line creates a variable, called s, that stores the string: "FridaysSaturdaysSundays"
- There are many useful functions for strings (more in Lab 2).
- s.count(x) will count the number of times the pattern, x, appears in s.
 - ▶ s.count("s") counts the number of lower case s that occurs.
 - num = s.count("s") stores the result in the variable num, for later.
 - What would print(s.count("sS")) output?

• ord():

input type: character output type: integer

• chr():

input type: integer output type: character

- What is chr(33)?
- What is ord("\$")?

▲□▶ ▲□▶ ▲□▶ ▲□▶ □ − ∽ Q (~

The plus (+) operator for numbers and strings

- x = 3 + 5 stores the number 8 in memory location x.
- x = x + 1 increases x by 1.
- s = "hi" + "Mom" stores "hiMom" in memory locations s.
- s = s + "A" adds the letter "A" to the end of the strings s.

Weekly Reminders!

Before next lecture, don't forget to:

- Work on this week's Online Lab
- Schedule an appointment to take the Quiz in lab 1001G Hunter North
- If you haven't already, schedule an appointment to take the Code Review (one every week) in lab 1001G Hunter North
- Submit this week's programming assignments
- If you need help, schedule an appointment for Tutoring in lab 1001G 11:30am-5:30pm
- Take the Lecture Preview on Blackboard on Monday (or no later than 10am on Tuesday)

CSci 127 (Hunter)

Lecture 2

February 06, 2024 32 / 33

Lecture Slips & Writing Boards

- Hand your lecture slip to a UTA.
- Return writing boards as you leave.
